User operations:

NEUES PAD

LINK KOPIEREN

DRUCKEN

SNAPSHOT ERSTELLEN

Neues Pad

"New Pad"

Creates a new pad with randomized permalink. Also populates the new Pad with default text.

Link Kopieren

"Copy Link"

Copies the Pad specific permalink to clipboard.

Drucken

"Print"

Print the parsed Markdown.

Snapshot erstellen

"Create Snapshot"

Creates a new pad out of existing one. It gets locked.

Changes in this Pad do NOT apply to Database nor anybody sees them!

Snapshot überschreiben

"Override Snapshot"

If this Pad was already locked once, the old lock will be overwritten if gets locked again!

Like created snapshots.

Why should I use BeePad?

With **BeePad** you are about to keep it simple.
Minimalistic, fast and reliable!

Ever dreamed of a markdown Pastebin?
Swim with the latest developers and find yourself enjoying **Markdown!**

With latest **ECMA Standards**, **NodeJS** and **MongoDB**, **BeePad** could run for you with **only 3 Files!**

Pads are directly saved into **MongoDB**.
So good in size:
You could save millions and millions of Pads!
